

TRIPLE TREE AERODROME ARRIVAL PROCEDURE

Due to the increased volume of traffic in the past few years, Triple Tree has adjusted the Arrival procedures for the fly-in to accommodate the pilots *AND* professionals in the control tower. This will help alleviate any potential hazards and ensure a safe and expeditious flow of traffic into a fun-filled environment.

ARRIVAL PROCEDURES FROM THE WAL-MART DISTRIBUTION CENTER:

- Approach Triple Tree (except Ultra-Lights) from a point 8 NM south of the airport. The landmark that will be used to identify this point is the Wal-Mart Distribution Center (N 34.543' W 81.995') (GRD 020/19.5 NM) which is located just south of Interstate 385 and US Highway 221. This landmark will be referred to as "*Wally World*".
- From Wally World fly a heading of **020°** along US Highway 221 and look for the town of Enoree (N 34.650 W 81.956). From Enoree, fly a heading of **305°** and fly directly over the Triple Tree Control Tower. Enter a midfield left downwind (northwest) for Runway 3 or, if runway 21 is the active, a right downwind. A close-in downwind would be appreciated. Tower will instruct you on landing sequence and traffic advisories at this point.
- All arrivals: Keep radio chatter to the absolute minimum. When checking in over *Wally World* and Enoree, just state your Type and Color; **No "N" number**. Radio congestion at this point is not safe! Monitor the Multi-com frequency of 122.9 MHz as far out as practical. Be on your toes!
- Maintain **85 KIAS (or 96 MPH) & 1,700 MSL**. Landing lights on.
- **Twins**: Same instruction as above except fly at **100 KIAS or less & 2,000 MSL**. You will be overflying aircraft on the same heading off "*Wally World*" who may or may-not be following the altitude restrictions. Eyes out the clear part of the canopy!
- **Ultra-Lights**: Enter the opposite downwind (southeast) at 1,200 MSL (500 AGL). If radio equipped, listen for advisories on 122.9. If not radio equipped, sequence yourself as best you can. Keep a close pattern and we'll work traffic around you. Clear the runway ASAP.
- **AGAIN**, your best radio etiquette *and then* only state your aircraft type and color e.g., "white over blue Bonanza, Wally World".
- Clear the runway ASAP to the east. Look for a "Follow-Me" vehicle and switch to 122.75 to communicate your intentions. Make sure that your **mags and master switches are off**. **Please check 121.5 for ELT.**

NORDO Aircraft: If you plan on flying into the aerodrome with no radio (**NORDO**); please call the control tower @ **(864-420-0596)** and provide them with the following info:

- 1) Type a/c
- 2) color
- 3) departure point
- 4) ETA to the airport
